

PROVEN QUALITY, NEW INDUSTRY

Portfolio[®] IVM Herbicide brings an impressive success rate into the highway, railroad, pipeline and utility, industrial, fence rows and other non-crop industries. The active ingredient sulfentrazone is a selective soil applied herbicide for the control of certain broadleaf weeds, grasses and sedges, including Thistle, Foxtail and ALS and Glyphosate resistant Kochia. Portfolio works quickly and has long soil residual to maximize value. With a formulation that heightens any existing herbicide tank, Portfolio[®] IVM Herbicide is the fuel on the road to weed-free plant life.

A PORTFOLIO OF USES IN ONE PRODUCT

The many industries Portfolio[®] IVM Herbicide covers are not the only way it is flexible. Portfolio[®] has proven strong at preemergence weed control on railroads in the West and postemergence weed control in pastures and utility spaces in the East, as well as both pre- and postemergence defense against broadleaf weeds. In addition, its liquid formulation allows for custom tank-mixtures that easily integrate into any weed control program.

PORTFOLIO[®] IVM HERBICIDE

- Liquid formulation for custom tank-mixture
- Pre/post broadleaf weed control
- Activity on resistant weed species
- Longer soil residual (rate dependent)
- Flexible applicator
- Effective in many industries and regions

WEEDS CONTROLLED:

- Kochia
- Russian Thistle
- Lambsquarter, common
- Morningglory
- Palmer Amaranth
- Pigweed (red root and smooth)
- Yellow Nutsedge
- And over 26 other labeled weeds

LABELED USE SITES:

- Railroads
- Highways
- Roadsides
- Pipelines and Utility Rights-of-Way
- Industrial Areas
- Fence Rows
- Other Non-Crop Sites
