

"I've had great success with Dismiss[®] NXT. It is my all-time favorite product for Sedges and Kyllinga."

Chris Allen
Superintendent
Eagle Lakes Golf Club
Naples, FL

WHAT IS DISMISS[®] NXT HERBICIDE?

Dismiss[®] NXT is the industry's premier Yellow Nutsedge and Green Kyllinga control product. It is a next generation tuber reduction combination product. Dismiss[®] NXT combines two active ingredients to provide visual symptoms within 24 hours and long-term control in both cool and warm-season turf. This formulation is absorbed by the roots and foliage and works to control Yellow Nutsedge tubers, reducing future populations.

HOW DOES DISMISS[®] NXT HERBICIDE WORK?

Dismiss[®] NXT is a selective post-emergent herbicide which controls Yellow Nutsedge, Green Kyllinga, and certain broadleaf weeds by contact and residual activity. This formulation contains the active ingredients carfentrazone-ethyl and sulfentrazone which work to inhibit PPO and are absorbed by shoots, foliage and roots for superior control. In a 2 year study*, Dismiss[®] NXT herbicide provided a 90% tuber population reduction vs. the control and 77% better than Dismiss[®] herbicide. Thereby, reducing tuber populations today means better turf tomorrow.

DISMISS[®] NXT HERBICIDE

- Increased tuber mortality to reduce long-term population of Yellow Nutsedge
- Visible results in 24 hours
- Reduce future tuber populations today and improve turf quality tomorrow

WEEDS CONTROLLED:

- Yellow Nutsedge
- Green Kyllinga

LABELED USE SITES:

- Golf Courses
- Residential Lawns
- Institutional Lawns
- Athletic Fields
- Commercial Sod Farms

GENERAL USE NOTES

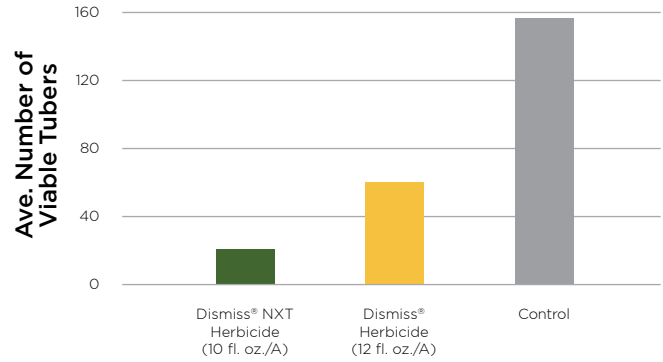

Dismiss® NXT is a selective post-emergent herbicide which controls Yellow Nutsedge, Green Kyllinga, and certain broadleaf weeds by contact and residual activity. Dismiss® NXT herbicide has been found to be compatible with most herbicides, fungicides, insecticides and growth regulators commonly used in turf and ornamental plant management. Consult label for complete tank mixture recommendations.

APPLICATION GUIDELINES:

- Post-emergent application is improved when adequate soil moisture is present at application.
- Backpack sprayers are appropriate for small areas and spot treatments. Wands fitted with a flat fan nozzle tip should be held stationary at the proper height during application and applied evenly to the weed-infested area. Overlapping or using a swinging motion can result in uneven coverage or over-application.
- This product may be used on seeded, sodded, or sprigged turfgrasses that are well established. First application of Dismiss® NXT herbicide to newly seeded, sodded or sprigged turfgrass can be made following second mowing providing the grass has developed into a uniform stand with a good root system.
- Recommended that Dismiss® NXT be applied using a spray volume of 1 - 1.5 gal/1,000 sq. ft.

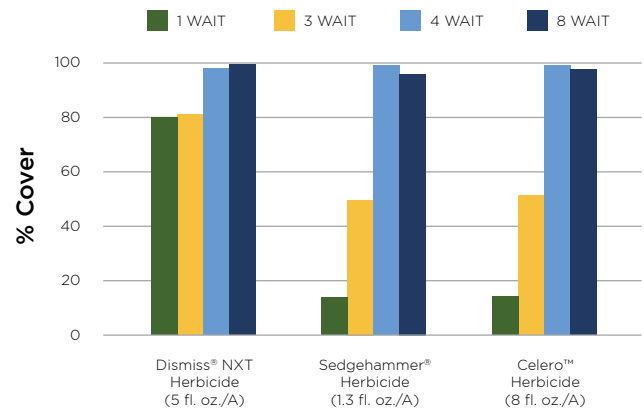

Grass Type	Maximum Use Rate		
	oz/1,000 sq ft	oz/A	lbs ai/A
Cool Season Grasses			
Creeping Bentgrass Perennial Ryegrass	0.117	5.1	0.139
Kentucky Bluegrass Fine Fescue Tall Fescue	0.117 - 0.234	5.0 - 6.0	0.138 - 0.28
Warm Season Grasses			
Bahiagrass Bermudagrass & hybrids Buffalograss Carpetgrass Centipedegrass Kikuyugrass Seashore Paspalum St. Augustinegrass Zoysiagrass	0.234 - 0.35	8.0 - 10.0	0.28 - 0.4

Improved Tuber Mortality Benefits with Dismiss® NXT Herbicide

FMC - Sparks, GA
Bermudagrass
2-year study

False Green Kyllinga Control

M. Elmore, Ph.D., Rutgers University
Initial applications made July 19, 2018; Two applications 21 days apart
Creeping Bentgrass Fairway
WAIT = weeks after treatment
